CAREER OBJECTIVE

Aspiring Data Analyst (expected graduation 2027) with hands-on experience in SQL, Python, Power BI, and Tableau, built through data internships processing 10K+ row datasets and delivering measurable business impact. Comfortable assessing data accuracy, identifying anomalies, and distilling analysis into actionable, decision-ready insights. Seeking the Google Data Analytics Apprenticeship to build a long-term career in data analytics.

EDUCATION

Galgotias University — B.Tech in Computer Science (Data Science) 2023 – 2027
Greater Noida

Bihar School Examination Board — Class 12th 2023
Patna

Bihar School Examination Board — Class 10th 2021
Patna

TECHNICAL SKILLS

Data Analysis: SQL, Python (Pandas, NumPy), Advanced Excel, EDA, feature engineering, anomaly detection
BI & Visualization: Power BI, Tableau, Microsoft Copilot Studio, dashboarding, reporting
Programming: Python, SQL, Java, C, JavaScript
Productivity: Google Workspace (Docs, Sheets, Gmail), Microsoft Office
ML/Data: scikit-learn, Matplotlib, Seaborn, Logistic Regression, Random Forest, LSTM
Databases: MySQL, PostgreSQL, Firebase Realtime DB
Tools/Platforms: Git, GitHub, Firebase Auth/Cloud Storage, Android Studio, Jupyter

PROJECTS

KisanSetu (Android App) — Java, Firebase, Android Studio
Farmer Support Platform
- Built a data-driven marketplace platform connecting farmers to buyers with real-time price feeds and reporting-style product listings, improving access to market information.
- Designed an accessible, high-contrast dashboard-style UI for low-literacy users — focused on clear data presentation and usability.

DocuMind - AI Document Q&A Assistant (In Progress) — Python, Django, LangChain, OpenAI API
- Building an automated document-processing workflow that extracts and organizes information for faster, structured retrieval — reducing manual document review effort.
- Designing a query-answering system grounded in retrieved data, applying prompt engineering to ensure accurate, reliable outputs for decision support.

IPO Web App & REST API — Django, HTML, CSS, JS
Blue Stock Fintech Project
- Built a business data management and reporting system with dynamic filtering and search, improving data retrieval efficiency by 35%.
- Implemented role-based access control to ensure secure, governed access to business data — aligned with enterprise data-governance practices.

Stock Bazaar Pro — Machine Learning, Python, Flask
Stock Market Analysis & Prediction
- Built an end-to-end data analysis and forecasting workflow to convert raw market data into actionable insights.
- Automated model evaluation and deployed via API for real-time reporting — demonstrating ability to turn analysis into a usable business tool.

INTERNSHIP EXPERIENCE

Software Development Engineer Intern — Blue Stock Fintech Jul 2025 – Sep 2025
- Built and deployed REST API endpoints for IPO data retrieval using Django, reducing data fetch latency by 35%.
- Redesigned frontend using HTML/CSS/JS, improving user engagement metrics by 30% (measured via session duration).

AI & ML Intern — EduSkills (AICTE – Google for Developers) Oct 2025 – Dec 2025
- Preprocessed 10K+ row datasets using Pandas/NumPy; built classification models (Random Forest, Logistic Regression) achieving 87% accuracy.
- Applied feature engineering (encoding, scaling, selection) and evaluated models using cross-validation, precision, recall.

CERTIFICATIONS

- Oracle Academy — Database Design
- Deloitte — Data Analytics Job Simulation
- IIT Madras — Design Thinking
- Google / AICTE — AI/ML Foundation

ACHIEVEMENTS

- Completed 15+ industry certifications across AI/ML, Deep Learning, Data Analytics, and Database Design.
- Solved 600+ DSA and algorithmic problems on LeetCode, GeeksforGeeks, and CodeChef
