CAREER OBJECTIVE

B.Tech Computer Science (Data Science) student (2027) who loves writing clean, efficient code — 1000+ DSA problems solved and hands-on production experience in Python, Java, Django, and FastAPI. Shipped REST APIs with measurable impact (35% latency reduction) and built full-stack AI products end-to-end, from model to API to UI. Seeking a Hacker Intern role to build great code for developers at HackerRank.

EDUCATION

Galgotias University — B.Tech in Computer Science (Data Science) 2023 – 2027
Greater Noida

Bihar School Examination Board — Class 12th 2023
Patna

Bihar School Examination Board — Class 10th 2021
Patna

TECHNICAL SKILLS

DSA & Problem Solving: 1000+ problems solved (LeetCode, GeeksforGeeks, CodeChef); LeetCode Contest Rating 1420, CodeChef Rating 1303; arrays, trees, graphs, DP, OOP

Programming: Python, Java, C, SQL, JavaScript

Testing & Debugging: PyTest, API endpoint verification, log analysis, production debugging

AI/ML: PyTorch, scikit-learn, Pandas, NumPy, model validation (cross-validation, precision/recall)

Backend/APIs: Django, REST API design & deployment, Flask, authentication & access control

Frontend/UX: React, Next.js, HTML, CSS — accessible & responsive UI design

Databases: MySQL, PostgreSQL, SQLite, Firebase — joins, aggregations, query optimization

Tools: Git, GitHub, Cursor AI, Jupyter, Android Studio

PROJECTS

SatQuery AI — Satellite Imagery Intelligence Platform (SIH- 2026) | Next.js, FastAPI, PyTorch, PyTest, REST API

- Engineered a multimodal satellite imagery platform (Next.js, FastAPI, PyTorch) with REST APIs for natural-language visual Q&A (SmolVLM + LoRA), change detection, and Optical+SAR fusion; delivers English and Hindi output.
- rained Siamese U-Net for building change detection (73.5% F1, 97.3%pixel accuracy on LEVIR-CD); ensured reliability with 294 automated PyTest tests (unit, integration, end-to-end) and output validation.

KisanSetu (Android App) — Java, Firebase, Android Studio

- Built a real-time data feed and marketplace platform using Firebase as the backing data store, handling live data sync at scale.

IPO Web App & REST API — SQL-Driven Reporting System | Django, SQL, HTML, CSS, JS

- Designed a database-backed reporting system with dynamic SQL filtering, search, and aggregation, improving data retrieval efficiency by 35%
- Implemented role-based access control (RBAC) - applying data governance and secure-access principles to structured data.

Stock Bazaar Pro — End-to-End Data Pipeline & Forecasting API | Python, Flask, SQL

- Built a full data pipeline: raw market data ingestion → cleaning/transformation → storage → forecasting model → API-based.
- Automated model evaluation and output validation, ensuring data0 quality and correctness across the pipeline ETL/DQ.

INTERNSHIP EXPERIENCE

Software Development Engineer Intern — Blue Stock Fintech Jul 2025 – Sep 2025

- Built and deployed REST API endpoints for IPO data retrieval using Django, reducing data fetch latency by 35% through SQL query optimization.
- Analyzed logs and query performance to debug and resolve production issues; redesigned frontend (HTML/CSS/JS), improving engagement by 30%.

AI & ML Intern — EduSkills (AICTE – Google for Developers) Oct 2025 – Dec 2025

- Cleaned and validated 10K+ row datasets (Pandas/NumPy); built Random Forest and Logistic Regression models with 87% accuracy.
- Evaluated models rigorously using cross-validation, precision, and recall to verify correctness before delivery.

CERTIFICATIONS

- Google Cloud Gen AI Academy APAC 2026
- AWS Technical Essentials
- AWS ML Engineer Associate Curriculum Overview
- Data Analytics Job Simulation – Deloitte
- Software Engineering Job Simulation — JPMorgan Chase
- Full Stack Development using MERN — CodeChef
- Practice Java (PRO) – CodeChef

ACHIEVEMENTS

- Solved 1000+ DSA and algorithmic problems on LeetCode, GeeksforGeeks, and CodeChef, LeetCode Contest Rating 1420, CodeChef Rating 1303 (Div 4).
- Completed 25+ industry certifications across AI/ML, Cloud, Data Analytics,SE and Database Design.
